World Health Day

Good health starts with good nutrition—especially for young children. In a poor village in Haiti, one-year-old Marcellus was losing weight rapidly and had a persistent cough. Because of crop losses, his single mother was struggling to feed the little boy and his five siblings. She knew Marcellus needed medical attention, but the price of transport to the closest health facility was more than she could afford. Hope came to Marcellus's mother in the form of a mobile clinic supported by Presbyterian World Service & Development and other Canadian Foodgrains Bank members. There, Marcellus received a nutrient-rich food supplement called Nourimanba, antibiotics and multivitamins. Marcellus is no longer malnourished and is on course to grow up healthy and strong.
